Have one system over all of your branches

Can be managed remotely

Make the most of the latest advances in modern communications technology AND save money with Apex from Mainlink.

Based on the Metaswitch platform, Apex shares its technology with world-wide platforms owned by BT, AT&T and Sprint, giving you the confidence to know that you are putting your business communications on a system of the highest quality and reliability.

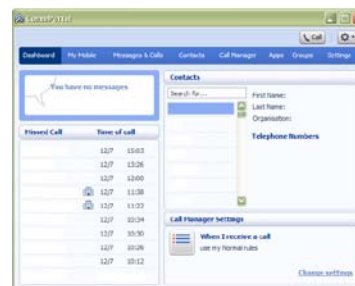

Accessible on a desk phone, PC softphone, mobile or via the internet; Apex gives you unprecedented flexibility and options to run your business how you want, not within the limits of your telephone system. If your team is based in one office, from home or through-out the world, Apex will unify their communications on one simple, cost effective platform which can be tailored to match their individual needs.

Unlike many competitors, Apex has a full suite of traditional telephony features including:

- *Call hold, transfer, music on hold*
- *Voicemail (to your phone or email)*
- *Music on hold*
- *Auto attendant*
- *Advanced and timed call management*
- *Fixed Mobile Convergence to connect your desk and mobile phones seamlessly*
- *Follow me functions so your call are routed to you, where you need them*
- *Desktop applications for call management*
- *Integrated phonebook*
- *Synchronisation with your PC contact list*
- *FSA and PCI standard call recording*
- *Fully supported and managed*

Apex comes with a range of options and services so that you can create a truly customised solution for your business. We can even complete bespoke development on the system to integrate it with your customer database or other systems.

Contact the Mainlink team today to see how Apex can save your company money and take your communications to the next level!
